

400 LOW FLOW CUTTER HEAD Skid Steer Cutter Head

LEAN GREEN MULCHING MACHINES

Gyro-Trac is now offering its worldwide, market-leading "fixed-tooth, planar-head" cutting technology for skid steers from 60 H.P. and up. Designed to work with hydraulic flows from 64 – 94 LPM, Gyro-Trac's Skid Steer cutter head has just revolutionized the stump grinding and heavy brush cutting markets

Did you ever think you could use a standard skid steer and an attachment that can . . .

- Cut a 150mm tree AND completely mulch it into fine chips — in just a few minutes?
- Grind 25 stumps to the ground — in less than half a day?
- Perform rapid, high-quality, low-cost right-of-way maintenance?
- Cut miles of survey lines or fence lines for less than any other method?
- Clear a couple of acres of land in no time?

Gyro-Trac's NEW Skid Steer mulching attachment will clear more small trees and heavy brush and grind more stumps in less time, and with far less weight and fuel than any other attachment in its class. The Skid Steer cutter head utilizes a standard "quick-attach" for fast and dependable connections to almost any skid steer on the market.

Gyro-Trac's Skid Steer cutter head uses the same revolutionary technology as our GT-25XP — a 260 HP, 10 ton, GT-25XP heavy duty mulching machine that outperforms ANY 15 ton and up, 500-600 H.P. mega-mulcher on the market today — by a margin of over 2 to 1! Just imagine what our low-cost, high-performance Toma-Ax Skid Steer cutter head will do for you! You'll never want to use a conventional brush cutter or stump grinder again — ever!

STANDARD SPECIFICATIONS

DIMENSIONS*

Cutting Width	1300 mm
Overall Width	1470 mm
Overall Height	970 mm
Overall Depth	790 mm
Weight	454 kg

PERFORMANCE*

No. of Teeth	20
Recommended RPM	3100 - 4500 RPM**
Hydraulic HP	60 - 110 HP variable
Maximum Flow	94 Lpm
Minimum Flow	64 Lpm

FOR USE ONLY WITH SKID STEERS EQUIPPED WITH ENCLOSED CABS.
Certain applications may require SAE-certified ROPS/FOPS skid steers.

* All specifications are preliminary and are subject to change without notice.

** Dependent upon horsepower and flow.

FEATURES AND BENEFITS

- Patented fixed-tooth planar cutting head outperforms the competition by as much as 2 to 1 "Quick-Attach" — mounts quickly on any skid steer
- Low-cost, high-performance and easily-replaceable teeth
- No need for hydraulic adjustments, works at almost any horsepower and flow — just "Attach & Go!"
