RESOURCES**

Posi-Shell®
ENVIRONMENTAL COATINGS

hydr & mulch (PTY) LTD

PROVIDES FLEXIBLE SOLUTIONS

Posi-Shell is a flexible tool that can be used for daily and intermediate waste cover, as well as erosion control. This unique flexibility provides landfill operators with one product that solves various issues they face.

INCREASES LANDFILL LIFE

By eliminating the use of costly bulky soil cover for the working face. This increased airspace can add up to 20% to the life of your landfill.

Landfill after 10 years reaching full capacity using soil as daily cover

CONSERVES NATURAL RESOURCES

By utilizing the Posi-Shell Cover System you are able to conserve soil and fuel. Conserving these natural resources is not only responsible, but it also helps reduce operating costs.

REDUCES DAILY OPERATING COSTS

By reducing the need for costly equipment, maintenance, fuel and labor. The daily cover process is an easy, quick, one to two man process that can be completed in less than one hour from start to finish.
